

Wood Design Rubber Runner Mats

Wood Design Rubber Runner Mats are runner mats that look like just maple, oak, pecan or cherry wood and thus appear much less industrial than typical runner matting. This wood runner matting helps protect & insulate hard floors and is quite easy to keep clean.

- These 1/8" thick, smooth wood runner mats can also help boost traction on slippery floors and thus help reduce slips and fall accidents.
- These 100% rubber runner mats are designed for heavy use and will resist curling and warping, even with constant traffic.
- Wood rubber runners can also be used as liners for maintenance & tool carts, countertop covering and just about any hard surface that can be spruced up with these wood runners.
