

Power Platform Rubber Mats

Shock Absorbent Power Platform Rubber Mats are extreme-duty, interlocking rubber mats that offer unsurpassed floor protection for high impact activities. This rubber power platform can work as a stand-alone punishment pad or be placed on top of existing rubber flooring for maximum floor protection.

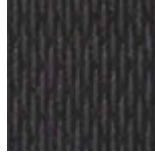

- Each mat is composed of two interlocking rubber sections to form a 6' x 7.5' shock absorbent platform.
- Power Platform Rubber Mats are 3/4" thick.
- The Cross-Cushion construction on the underside of these rubber mats provides for ultimate shock absorption and floor protection.
- These power platform gym mats have beveled (sloped, no-teeth) edges around the entire perimeter for a smoother transition on and off the mat.
- The non-porous, indestructible, vulcanized rubber on these platform mats has a textured surface for improved traction.
- Shock Absorbent Power Platform Rubber Mats are excellent for use under heavy workout equipment and weight-lifting machinery.
